Professional Experience

PwC Luxembourg — Sep. 2026 – Present
Data Engineer (Permanent) — *Luxembourg*

- Build and maintain the Azure infrastructure of the team's data and AI platforms (data collection, internal RAG services) with Terraform and Azure DevOps CI/CD
- Support the team's application projects, mostly .NET 6/8, on hosting, deployment and runtime issues

PwC Luxembourg — Feb. 2026 – Aug. 2026
Cloud Infrastructure Intern – Data Science Team — *Luxembourg*

- Migrated a manually-built production data platform to a locked-down enterprise Azure tenant, describing its 60+ resources in Terraform
- Made releases safe and repeatable: every change now follows the same automated, security-checked path from test to production (Azure DevOps)
- Brought the platform's apps and data flows back online after the move (secure private networking)
- Designed and deployed the Azure infrastructure (Terraform) of an internal RAG / agentic-AI services hub, and integrated its back-end and front-end

Kagawa University – Machine Learning Laboratory — Feb. 2025 – Apr. 2025
MLOps Technician Intern — *Takamatsu, Japan*

- Co-authored a published research paper on hybrid MLOps practices for SMEs
- Built a hybrid CI/CD pipeline (GitLab, Docker) and ETL workflows to train ML models in the cloud

Junior Enterprise (Junior PAC) — Sep. 2024 – Present
Association President — *Annecy, France*

- Lead a 6-engineer team in a student-run consulting association (Junior-Entreprise)
- Manage client relationships, run meetings, and oversee Data & Software consulting projects

EDF – Saint-Alban Nuclear Power Plant — *Intern* — Aug. 2024

- Technical inspections of safety equipment (SCBA) and maintenance of regulatory documentation

Projects

Data Curation Pipeline & Web Crawling Project — Sep. 2025 – Feb. 2026
GenAI Laboratory – BFH — *Bern, Switzerland*

- Developed an automated system (Python, MongoDB) integrating LLM-calibrated heuristic filtering to extract health-related data from 5 Swiss media sources
- Processed and cleaned over 900,000 URLs to build a structured corpus for Topic Modeling

Education

Polytech Annecy – Master of Engineering in CS & Data Analytics — Sep. 2023 – Sep. 2026
Specialization: Computer Science, Data & Applications — *Annecy, France*

Bern University of Applied Sciences (BFH) – MSc Engineering (Exchange) — Sep. 2025 – Feb. 2026
Transformers, Self-Supervised Learning, Cloud Systems — *Bern, Switzerland*

Kagawa University – Master's in Data Science (Exchange) Apr. 2025 – Aug. 2025
Blockchain, Cryptography, Mathematics & Data Science *Takamatsu, Japan*

Lycée Claude Gellé – Classe Préparatoire aux Grandes Écoles (MP) Sep. 2021 – Sep. 2023

Lycée La Malgrange – Baccalauréat with Honours (Maths, Physics, CS) Sep. 2018 – Sep. 2021

Skills

Cloud & DevOps: Azure (Data Factory, Functions, SQL, Cosmos DB, VNet & Private Endpoints), Terraform (IaC), Azure DevOps CI/CD (YAML), Docker, AWS

Programming: Python (advanced – since 2021), SQL (PostgreSQL, MySQL), C# / .NET (6, 8), Java

Data & ML: PyTorch, TensorFlow, MLOps (CI/CD, monitoring), ETL pipelines

Visualization: Power BI, Tableau, Python visualization libraries

Languages: French (Native), English (Fluent – TOEIC 920/990), Japanese (N3/B1)

Interests: Endurance sports (running, cycling, skiing) | Japanese culture & language
